Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claims 1, 2, 4-6 and 8 are allowed primarily because claims 1 and 5 require adding the second impurity through at least the conductive film and the gate insulating film, wherein the conductive film is located over the gate insulating film when the second impurity is added (i.e., such an arrangement provides the protective function noted by the applicant, on page 10, first full paragraph, in the remarks filed on September 26, 2005).

Claims 9-16 are allowed primarily because claims 9 and 13 require the conductive film to be removed after removing the sidewall, i.e., such a sequence indicates that portions of the conductive film that were underneath the sidewall are removed.

Claims 17-25 are allowed for reasons stated in the prior Office action.

Claims 26-29 are allowed primarily because claims 26 and 27 require the conductive film to be formed over the gate electrode and the gate insulating film (and the insulating film in claim 27, i.e., the conductive film is not underneath any of these elements); removing the sidewall; and removing the conductive film. Since the conductive film is not underneath the gate electrode, the gate insulating film, or the insulating film (claim 27), no portion of the conductive film remains after the steps of removing the sidewall and the conductive film, e.g., see Figs. 3E-3F, 5C-5D, 9C-10A.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
